

Formula Layouts

Mass and energy satisfy $E = mc^2$ in the simplest model.

$$\frac{x^2 + \alpha}{y_1}$$

Complex fraction with scripts and Greek.

$$\sum_{i=1}^n i + \int_0^1 x \, dx \tag{1}$$

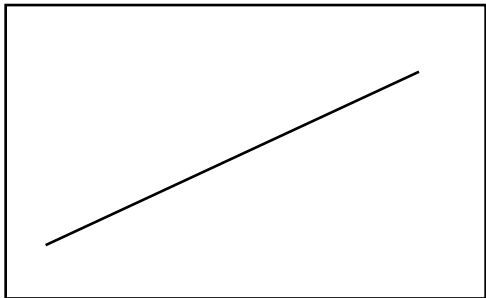

Figure 1. Linear response.

The nearby figure remains independent of equation (1).

Two-column formula layout

Left prose introduces a $a_i + b_i = c_i$

Right prose follows.

$$x^2 + y^2 = z^2$$
